PRODUCT DESCRIPTION

This machine has 125 + watts of power, 4mhz in radio waves for easy, fast, and safe surgery. Totally isolated mono-polar configuration allowing for fine, normal, and coagulation modes—with immediate BiPolar switching.

Instant switching to bipolar, for pinpoint bleeder control or invert forceps for larger areas of coagulation. It also has Linier adjustable power control, assuring the correct power, whether patient is a pocket pet or equine.

FEATURES & BENEFITS

- Autoclavable hand piece and cords
- Industrial grade hybrid electronics for stable, cool and safe operation
- Easy to use control panel
